## censhare

|                         |                                                               |
|-------------------------|---------------------------------------------------------------|
| censhare-Server         | censhare-Common, rsync, java-11-devel                         |
| censhare-Service-Client | censhare-Common, censhare-ImageTools, java-11-devel           |
| censhare-ImageTools     | censhare-Common, Libreoffice, censhare-Image, Image-libraries |
| censhare-Common         | at                                                            |

## Libreoffice

| Name                   | Description                                  | Dependencies                                                       | Provided by censhare repository? |
|------------------------|----------------------------------------------|--------------------------------------------------------------------|----------------------------------|
| libreoffice6.1-impress | Impress brand module for LibreOffice 6.1     | libreoffice6.1, libobasis6.1-impress                               | yes                              |
| libreoffice6.1-writer  | Writer brand module for LibreOffice 6.1      | libreoffice6.1-writer, libobasis6.1-writer                         | yes                              |
| libreoffice6.1-calc    | Calc brand module for LibreOffice 6.1        | libreoffice6.1, libobasis6.1-calc                                  | yes                              |
| libobasis6.1-en-US-res | Language resource module for LibreOffice 6.1 | libobasis6.1-en-US, rpmlib                                         | yes                              |
| libobasis6.1-impress   | Impress module for LibreOffice 6.1           | libobasis6.1-core, rpmlib                                          | yes                              |
| libobasis6.1-writer    | Writer module for LibreOffice 6.1            | libobasis6.1-core, rpmlib                                          | yes                              |
| libreoffice6.1         | Brand module for LibreOffice 6.1             | libreoffice6.1-ure, libobasis6.1-core, libobasis6.1-images, rpmlib | yes                              |
| libobasis6.1-en-US     | Language module for LibreOffice 6.1          | libobasis6.1-core, rpmlib                                          | yes                              |
| libobasis6.1-oofonts   | 3rd party free fonts for LibreOffice 6.1     | libobasis6.1-core, rpmlib                                          | yes                              |
| libobasis6.1-pyuno     | Pyuno module for LibreOffice 6.1             | libobasis6.1-core, rpmlib                                          | yes                              |
| libobasis6.1-images    | Images module for LibreOffice 6.1            | libobasis6.1-core, rpmlib                                          | yes                              |
| libobasis6.1-calc      | Calc module for LibreOffice 6.1              | libobasis6.1-core, rpmlib                                          | yes                              |
| libobasis6.1-core      | Core module for LibreOffice 6.1              | libXinerama.so.1, libfreetype.so.6, rpmlib, libreoffice6.1-ure     | yes                              |
| libreoffice6.1-ure     | UNO Runtime Environment                      | rpmlib                                                             | yes                              |

## censhare-image

| Name                                 | Description                            | Dependencies                                                               | Provided by censhare repository? |
|--------------------------------------|----------------------------------------|----------------------------------------------------------------------------|----------------------------------|
| censhare-image-service-exiftool      | To extract exif information            | censhare-common, perl, rpmlib                                              | yes                              |
| censhare-image-service-ghostscript   | For PDF Previews                       | censhare-Common, censhare-image-service-ghostscript-fonts, /bin/sh, rpmlib | yes                              |
| censhare-image-service-imagemagick   | To create preview and thumbnail images | censhare-Common, censhare-image-service-ghostscript, /bin/sh, rpmlib       | yes                              |
| censhare-image-service-wkhtmltoimage | HTML to Image Preview                  | censhare-Common, rpmlib                                                    | yes                              |

## Image-libraries

| N<br>a<br>m<br>e      | Description                                                          | Depenencies                                                                                                                                                                                                                                                                                                                                                                       | Provided by<br>censhare<br>repository? |
|-----------------------|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------|
| lib<br>png            | For creating and<br>manipulating PNG files                           | /sbin/ldconfig, libc.so.6, libm.so.6, libpng.so.3, libpng12.so.0, libz.so.1, rpmlib, rtld, libgomp                                                                                                                                                                                                                                                                                | no                                     |
| ca<br>iro             | provide high-quality<br>display and print output                     | /sbin/ldconfig, libX11.so.6, libXrender.so.1, libc.so.6, libcairo.so.2, libfontconfig.so.1, libfreetype.so.6, libm.so.6, libpixman-1.so.0, libpng12.so.0, libz.so.1, rpmlib, rtld, libgomp                                                                                                                                                                                        | no                                     |
| cu<br>ps<br>-<br>libs | provides a portable<br>printing layer for UNIX®<br>operating systems | /sbin/ldconfig, libaudit.so.1, libavahi-client.so.3, libavahi-common.so.3, libc.so.6, libcom_err.so.2, libcrypt.so.1, libcups.so.2, libgcc_s.so.1, libgcc_s.so.1, libgnutls.so.26, libgssapi_krb5.so.2, libjpeg.so.62, libk5crypto.so.3, libkrb5.so.3, libm.so.6, libpng12.so.0, libpthread.so.0, libselinux.so.1, libstdc++.so.6, libtiff.so.3, libz.so.1, rpmlib, rtld, libgomp | no                                     |
| lib<br>SM             | The X.Org X11 SM<br>(Session Management)<br>runtime library          | /sbin/ldconfig, libICE.so.6, libSM.so.6, libc.so.6, libuuid.so.1, rpmlib, rtld, libgomp                                                                                                                                                                                                                                                                                           | no                                     |

## system

| Name              | Description                                                                                                         | Dependencies                                                                                                                    | provides by<br>censhare repository? |
|-------------------|---------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| rsync             | Rsync uses a reliable algorithm to bring remote and host files into sync very quickly.                              | config(rsync), libacl.so.1, libc.so.6, libpopt.so.0, rpmlib, rtld                                                               | no                                  |
| at                | At and batch read commands from standard input or from a specified file                                             | /bin/sh, chkconfig, config(at), coreutils, initscripts, libc.so.6, libpam.so.0, libpam_misc.so.0, libselinux.so.1, rpmlib, rtld | no                                  |
| zlib              | Zlib is a general-purpose, patent-free, lossless data compression library which is used by many different programs. | /sbin/ldconfig, libc.so.6, libz.so.1, rpmlib, rtld                                                                              | no                                  |
| systemd<br>-units |                                                                                                                     | <b>Systembestandteil</b>                                                                                                        | no                                  |
