Administration_SysAdmin

Initial setup and core administration of censhare.
Manage advanced functionalities and applications.

The censhare system administration guide is an essential resource for censhare administrators who want to roll out censhare to their organizations. This guide introduces you to the tools and tasks needed for a personalized censhare experience.

As a censhare administrator, you set up and manage the system for your organization. You monitor that the applications run smoothly.

The censhare platform provides endless options for enhancement and customization to meet your organization's or customers' needs for a personalized marketing solution.

You can create custom workspaces, workflows, widgets, and features.

For example:

- Provide a corporate dashboard for your organization with daily tasks and news.
- Change an asset page.
- Ingest, and automatically enrich content into censhare that you receive from other applications.
